

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director
Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

For a petition to be considered valid it must:

1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water
Room W264
402 West Washington Street
Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : DR-477

Lake : Deer Lake

Applicant : Noble County Commissioners
101 North Orange Street
Albion, IN 46701

Description : A steel weir lake level control structure will be constructed across the Deer Lake outlet (Solomon Creek) to maintain the elevation of the lake. The top elevation of the 30' wide weir will be 893.0', NGVD, with a 12' portion in the center to be set at 891.0', NGVD. Four (4) gabion mattresses measuring 6' by 12' will be placed in the creek upstream of the weir, and rip rap over geotextile fabric will be placed along the bed and banks both upstream and downstream of the weir. In addition, bottom dipping and bank repairs will occur along Solomon Creek for approximately 2500'. Details of the project are contained in information and plans received at the Division of Water on December 8, 2008.

Location : Beginning at the Deer Lake outlet (Solomon Creek) and extending downstream approximately 2500' to County Road 200 North
DOWNSTREAM: near Kimmell, Sparta Township, Noble County
NW¼, Section 25, T 34N, R 8E, Ligonier Quadrangle
Quad Code: 4108545
UTM Coordinates: Downstream 4582035 North, 620835 East
UPSTREAM:
UTM Coordinates: Upstream 4581390 North, 620925 East

Statute/Rule : "Ditch" Act, IC 14-26-5

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : DR-479

Stream : Chain-o-lakes Ditch

Applicant : St. Joseph County Drainage Board
John R McNamara, PE, PLS
County-City Building
227 West Jefferson Boulevard
South Bend, IN 46601-1871

Description : The bottom of the ditch will be excavated from the control structure to a private lane culvert approximately 800' downstream. The ditch will be returned to the original depth and grade. An inline pond will not be dredged. Work will be done from the north side. The existing culvert under Quince Road will be replaced with a similar structure. Details of the project are contained in information and plans received at the Division of Water on December 15, 2008.

Location : Beginning at the control structure for South Chain Lake and extending downstream approximately 800' to a private lane crossing
DOWNSTREAM: near Westfield, Warren Township, St. Joseph County
SE¼, SW¼, SE¼, Section 2, T 37N, R 1E, Lydick Quadrangle
Quad Code: 4108664
UTM Coordinates: Downstream 4614394 North, 551935 East
UPSTREAM: NW¼, NE¼, NE¼, Section 11, T 37N, R 1E

UTM Coordinates: Upstream 4614308 North, 552016 East

Statute/Rule : "Ditch" Act, IC 14-26-5

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-25083

Stream : Pigeon Creek

Applicant : Pigeon Creek Drainage Board
F Mayo Sanders
317 South Wayne Street, Suite 2K
Angola, IN 46703-1958

Description : An approximately 170' long by 40' wide sandbar will be removed from an inside bend in the creek to improve flow within the channel. Details of the project are contained in information and plans received at the Division of Water on November 21, 2008.

Location : Along the east bank of Pigeon Creek directly north of the Otter (West) Lake outlet channel and US 20
DOWNSTREAM: near Angola, Jackson Township, Steuben County
SE¼, S½, Section 22, T 37N, R 12E, Orland Quadrangle
Quad Code: 4108562
UTM Coordinates: Downstream 4612032 North, 652525 East
UPSTREAM: near Angola, Jackson Township, Steuben County
SE¼, S½, Section 20, T 37N, R 12E, Orland Quadrangle
Quad Code: 4108562
UTM Coordinates: Upstream 4611998 North, 652531 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

30 Day Public Notice Report

Application # : FW-25096

Stream : Dry Branch

Applicant : City of Crawfordsville
Mayor Charles Coons
300 East Pike Street
PO Box 329
Crawfordsville, IN 47933-0329

Description : Approximately 140' of the stream will be relocated west about 5'. The existing slope will not be altered and the side slopes will be a maximum of 4:1. The bank will be stabilized with about 223 cubic yards of glacial stone and the bottom of the creek will be stabilized with approximately 102 cubic yards of native seed mixture. Three storm sewer pipes, 36", 18" and 12" diameter will outlet into the relocated portion of the stream. In addition, three bioretention ponds will be constructed with spillways and pipes to allow for drainage to the creek. Details of the project are contained in information and plans received at the Division of Water on December 1, 2008.

Location : Beginning approximately 140' downstream of the Elmore Street stream crossing and continuing upstream 1300'
DOWNSTREAM: at Crawfordsville, Union Township, Montgomery County
SE $\frac{1}{4}$, SW $\frac{1}{4}$, NE $\frac{1}{4}$, Section 5, T 18N, R 4W, Crawfordsville Quadrangle
Quad Code: 4008618
UTM Coordinates: Downstream 4431389 North, 509375 East
UPSTREAM: SW $\frac{1}{4}$, NE $\frac{1}{4}$, SE $\frac{1}{4}$

UTM Coordinates: Upstream 4431009 North, 509592 East

30 Day Public Notice Report

Application # : FW-25105

Stream : Cady Marsh Ditch

Applicant : Town of Highland
John Bach, Public Works Director
3333 Ridge Road
Highland, IN 46332-2089

Description : A new culvert crossing will be placed in Cady Marsh Ditch to carry Cline Avenue across the ditch. The new crossing will consist of a 16' by 9' arched culvert set in 60 tons of 18" revetment riprap over geotextile fabric. Details of the project are contained in information and plans received at the Division of Water on December 8, 2008 and December 9, 2008.

Location : Beginning approximately 1000' south of the West Ridge Road and Cline Avenue intersection and extending approximately 2400' south
DOWNSTREAM: near Griffin, Calumet Township, Lake County
NE¼, SE¼, SE¼, Section 27, T 36N, R 9W, Highland Quadrangle
Quad Code: 4108754
UTM Coordinates: Downstream 4599784 North, 464369 East

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-25107

Stream : Hart Ditch

Applicant : Lake County Board of Commissioners
Duane A Alverson, PE
1100 East Monitor Street
Crown Point, IN 46307-3521

Description : The existing 3-span, prestressed box beam bridge carrying traffic over Hart Ditch will be replaced with a new structure on essentially the same alignment to improve traffic flow. The new structure will be a 3-span, prestressed, composite box beam bridge with span lengths of 37.0', 37.0', and 37.0'. The structure will have an out-to-out length of 536' and a clear roadway width of 28.6'. The abutments and piers will be skewed 20 degrees to align with the streamflow. The new approach roads will match the existing approaches at the project limits to include 6' wide sidewalks on both sides of the bridge. The existing structure will be completely removed. The project is 80% federally funded. Details of the project are contained in information and plans received at the Division of Water on December 9, 2008.

Location : At the Poplar Lane stream crossing
near Highland, Lake County
SE¼, SW¼, NE¼, Section 31, T 36N, R 9W, Highland Quadrangle
Quad Code: 4108754
UTM Coordinates: Downstream 4597810 North, 458629 East

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312 IAC 10

Indiana Department of Natural Resources / Division of Water

30 Day Public Notice Report

Application # : FW-25108

Stream : Houchins Ditch

Applicant : Gibson County Highway Department
Jerry Heldt, Highway Supervisor
RR 2 Box 104
Princeton, IN 47670-0104

Description : Gibson County Bridge No. 68 carrying traffic over Houchins Ditch will be replaced with a three-span continuous concrete slab structure with span lengths of 35', 50' and 35' and will essentially have the same horizontal and vertical alignments. The bridge will be a two-lane facility with a 32' clear roadway width. The grade of the roadway will be raised 3.5' in order to meet minimum hydraulic design requirements. The roadway approaches will require two 10' travel lanes bordered by 2' shoulders. The project length will be 950' with 50' of incidental construction on the north end and 50' on the south end. Approximately 430' of the Unnamed Tributary to Houchins Ditch will be modified to allow for the grade of County Road 350 East to be raised and for reshaping the channel. Additionally, 100' of the channel will be lined with riprap beginning at the confluence with Houchins Ditch. In channel work for Houchins Ditch will extend 80' upstream and 80' downstream to allow for the replacement of the bridge, riprap and geotextiles. Approximately 150 cubic yards of backfill, consisting of soil from the excavation for the pier footing, will be placed below the ordinary high water mark. Details of the project are contained in information and plans received at the Division of Water on December 9, 2008.

Location : Gibson County Bridge #68; located at the Houghins Ditch and County Road 350 East crossing
at Wheeling, Washington Township, Gibson County
SE¼, SE¼, NE¼, Section 27, T 1S, R 10W, Patoka Quadrangle
Quad Code: 3808745

30 Day Public Notice Report

Application # : FW-25114

Stream : Unnamed Tributary
Robbins Ditch

Applicant : *Indiana Department of Transportation
Richard L Phillabaum
100 North Senate Avenue, Room N642
Indianapolis, IN 46204-2216

Description : The existing spillway structure consisting of a steel sheet pile weir spillway with a 54-inch diameter culvert and a United States Bureau of Reclamation (USBR) Type VI energy dissipation system will be replaced with a new concrete labyrinth weir spillway. The new labyrinth spillway will be approximately 690 feet long and 10 feet high. The spillway crest elevation will generally be 715.55 feet (NGVD 29). A 34.5 foot long notch will be placed in the labyrinth spillway at crest elevation 714.55 feet (NGVD 29) in order to pass flows up to the 100-year discharge and maintain the established legal lake level of 714.56 (NGVD 29). The earthen embankment of the dam will be constructed with 4 horizontal: 1 vertical upstream and downstream side slopes. Approximately 1,069 feet of the existing spillway outlet stream channel will be impacted as a result of the new spillway placement. A channel of approximately 759 feet in length (9 feet bottom width, 2 feet depth and 4 vertical: 1 horizontal side slopes) is being proposed to connect the spillway energy dissipation system with the existing channel. This results in a loss of stream length equal to 310 feet. The existing channel will be filled with earthen material. Approximately 275 feet of steel sheet piling will be driven into the soil upstream of the proposed spillway structure. The sheet piling will serve as a permanent cutoff wall for the spillway. A concrete stilling basin/riprap energy dissipation system will be constructed downstream of the new labyrinth spillway. The stilling basin will be constructed with impact blocks and an end sill. The top of the stilling basin will be constructed at 700.75 feet (NGVD 29). After the spillway outlet velocity is adequately reduced, fieldstone will be used along the spillway outlet channel banks to minimize channel bank erosion. Additionally, State Road 23 will be realigned and constructed along the crest of the embankment. The proposed bridge will be a two-span structure (68 feet 3 inches for each span) and the substructures will be built integral with the labyrinth spillway structure. Details of the project are contained in information and plans received at the Division of Water on December 12, 2008.

Location : Beginning approximately 310' east of State Road 23 crossing of Robbins Ditch and continuing east for 1000'
DOWNSTREAM: near Walkerton, Oregon Township, Starke County

Stream : Elkhart River

Applicant : City of Elkhart/Buildings & Grounds
Mike Lightner
229 South 2nd Street
Elkhart, IN 46516-3112

Description : Approximately 345 cubic yards of debris will be excavated along 149' of a recreational path located on the Elkhart River due to a failed embankment. Approximately 276 cubic yards of backfill, 138 cubic yards of topsoil, 148 tons of riprap, and 148 tons of glacial stone will be placed along the site in order to stabilize the embankment from further erosion. Additionally, a 149 foot silt fence, a 3725 square feet of surf blanket, and 3725 square feet of hydroseeding will be used to stabilize the slope. Details of the project are contained in information and plans received at the Division of Water on December 15, 2008.

Location : Located approximately 800' west and 300;' south of the Goshen Avenue and Jackson Boulevard intersection and extending approximately 125' south

Application # : FW-25124

Stream : Willow Creek

Applicant : Willow Ridge Golf Club
Mark Sadler
17000 Willow Ridge Trail
Fort Wayne, IN 46845-9339

Description : The existing single-span bridge carrying Willow Ridge Trail over Willow Creek has deteriorated and will be replaced with a new structure on essentially the same alignment to perpetuate traffic. The new structure will be a three-span bridge with span lengths of 18', 22.5', and 18'. The structure will have an out-to-out length of 61' and a clear roadway width of 24'. The spill through abutments will have variable sideslopes (to match existing) armored with limestone riprap. The abutments and piers will not be skewed. The approach roads will remain and the structure top of road elevation will match the existing bridge. The waterway area below the Q100 will remain the same. The total waterway area below the low chord elevation will be increased. The existing structure will be completely removed. Details of the project are contained in information received electronically at the Division of Water on January 7, 2009 and in plans and information received at the Division of Water on

Location : At the Willow Ridge Trail where it crosses Willow Creek
at Huntertown, Perry Township, Allen County

Lake : Oliver Lake

Applicant : Byron Keck
20040 CR 14
Bristol, IN 46507-9446

Description : The northern portion (measuring approximately 170' by 30') of an existing t-shaped channel measuring 780' by 60' at its longest point and 170' by 30' at the northern section will be dredged. Accumulated muck and debris will be removed from the channel bed by dredging below the lake's legal level at the center of the channel and sloping uniformly at the shoreline. The excavated material will be transported to an upland containment area for dewatering and disposal. Specific project information will be added to the description as the application is further reviewed. Details of the project are contained in information and plans received at the Division of Water on December 15, 2008.

Location : Beginning approximately 1550' west and 200' south of the County Road 450 South and County Road 100 East intersection and extending 170' west and 30' south
near Wolcottville, Johnson Township, LaGrange County

Lake : Lake Wawasee

Applicant : Michael G Welsh
3572 Brumley Mews
Carmel, IN 46033-3022

Description : A new boatwell will be excavated within the property of the applicant on a channel to Lake Wawasee. The boatwell will be cut into existing concrete seawall and will be 10' wide and will extend 25' landward of the average normal shoreline of the lake. Approximately 1300 cubic feet of earth will be removed to create a depth of approximately five feet. The excavated material will be either placed on the property of the applicant and stabilized with a lawn seed mixture or removed off-site. Details of the project are contained in information received electronically at the Division of Water on December 18, 2008 and in plans and information received at the Division of Water on December 24, 2008.

Location : lot directly across from 11479 N. Odgen Point Road
near Syracuse, Turkey Creek Township, Kosciusko County
Section 14, T 34N, R 7E

Lake : Lake Wawasee

Applicant : Kristine Leetz
Runaway Bay #29
10095 North Turkey Creek Drive
Syracuse, IN 46567-9678

Description : An extension to the pier will be placed in front of the property of the applicant on Lake Wawasee (pier 340E) to provide more space to the residents. The 4' wide pier will extend 177' lakeward of, and perpendicular to, the shoreline of the lake. The pier currently extends 153' from the shoreline. Details of the project are contained in information received electronically at the Division of Water on January 5, 2009 and in plans and information received at the Division of Water on January 7, 2009.

Location : From the intersection of Highway 13 and 1000N in Syracuse, IN. Follow 1000N east, winding around Lake Wawasee. The road turns into Hatchery Rd. then becomes Turkey Creek Drive. The location of the pier is approximately 1/2 mile past the public launch.. Runaway Condominiums second entrance. The pier to be extended is 340E and services the residents in Units 25-29.

Lake : Snow Lake

Applicant : Steve W Nixon
618 Saint Annes Drive
Holland, OH 43528-9000

Description : A new underwater beach will be constructed in front of the property of the applicant on Snow Lake to provide an area for swimming. The beach will consist of a 4" to 5" thick layer of 7/64 inch clean washed pea gravel placed directly on the lakebed. The beach will begin approximately 5' west of the eastern property line and will extend westerly across 26' of the 52' frontage. It will have a maximum lakeward projection of 30'. This beach was approved as part of application PL-18546 in 2000 but not done at that time. I would also like to complete this beach during the months of February or March 2009 as I will have the pea gravel put on the ice. Details of the project are contained in information received electronically at the Division of Water on January 7, 2009 and in plans and information received at the Division of Water on
